SECURITY DIAMOND SERVICES

THE WORD OF THE CEO

Founded in 2011 at Bangkok, "**Security Diamond Services Co Ltd**" quickly imposed by highlighting its expertise through the new technologies' vector and renowned audits from France to Asia Pacific through Middle East.

Thanks to its original concept "**all in one**", SDS establishes full security environment. Starting by evaluation. SDS places all protections and trains for operations management. SDS is the creator of the security "**One to top**".

In 2016, SDS was solicited because a lack of security expertise. Naturally, SDS has deployed first in Southeast Asia and then beyond thanks to the **economic intelligence**.

SDS extends its business in a market environment that faces both intensive competitive pressures, where **high standards** must be met, as well as an ever-increasing risk of failures or bad influences may occur.

In this matter, **SDS** helps you to consolidate your position by protecting your business serenely, wherever they are.

These services cover a wide spectrum that allows companies to understand, analyze and adjust, in order to protect their **assets** and **image**.

Our Security Referents, rich of a 20 years' experience in **operational strategy**, **intelligence analysis** and **crisis management**, assist you at each stage of the process.

SECURITY CONCEPT

Although it is acknowledged as useful, security in Asia is generally seen of secondary importance because it is often too abstract or confusing. SDS will make security simple and clear.

IDENTIFY

A diplomat may be spied upon and a diamond dealer threatened. Likewise, the window of a jewellery, students of a school or the swimming pool of a hotel may reveal various types of hazards. Risk assessment allows a rational use of means and costs to ensure optimum protection.

PERSONALIZE

A wall of screens blinds watchmen and a surveillance camera doesn't catch thieves. Tools are managed by humans, humans are powerless without them and acts follow rules. This "humans-tools-rules" trifecta is always implemented because it is the very principle of effective security and therefore the very basis of crisis management.

We have the possibility of providing guards who are English speakers, trained in computer technology or any other specific relevant competency. Our security officers have all received compulsory and legal training and are SDS full-time employees. As such, they have full social coverage and other benefits.

YOU ARE UNIQUE

Your needs must be ranked through a 360° vision. SDS designs, personalizes and adapts the operational, technological, regulatory and training methods so as to ensure excellence and develop a trusting, permanent and ever-closer business relationship.

TECHNOLOGY

ATTENTION

IP cameras, ultra-sound and AIV (Advanced Intelligent Video) increase human capacity when vigilance must be absolute. Swimming pools, for instance, may cause tragedies and many accidents occur every year.

CONSTANT WATCHFULNESS

E-KUBE, which is distributed in Asia through SDS is revolutionary and is the sole reliable detection technology. E-KUBE identifies and alerts thanks to its powerful "Jaguar" program which is used by high-risk military missions.

SAFE

With its cutting-edge protection capacity, E-KUBE thoroughly secures whatever area you choose. Thanks to our experts' know-how, its powerful potential will be deployed to benefit your tranquillity.

TRAINING & COACHING

KNOWLEDGE IS POWER

There are knowledge and tools to detect threats and face unforeseen events or a major crisis.

No one is born with such knowledge and it always requires upgrading.

SDS offers a wide training range in line with all security concerns and will enable you to prepare for any critical event or situation.

ACTORS

Mastery of basic knowledge is paramount, it is accessible and will shall provide the necessary support.

MANAGERS

As supervisor, a manager must ensure his or her actions follow a formal protocol and convey the information. His/her knowhow are the basis of managerial credibility and legitimacy vis-à-vis executive levels.

EXECUTIVES

Communication is the very principle of crisis management. Detection and analysis power communication.

SDS has crisis management expertise and provides you with a wide range of impact and action possibilities.

KNOWLEDGE GENERATES EXPERTISE

CYBER THREAT FROM HELL

The more intangible the threat, the greater the hazard, because anything can be faked, given time and means. Your digital equity is the cornerstone of your activity, and must be secured. From user-friendly to vital, you will gain control over all aspects of your own cyber tranquillity.

Infrastructures are crucial and physical access to offices and computer servers of various operational sectors must be watertight. Access, rules, instructions and legislation in force are all constraints and stages to be followed so as to ensure full implementation

YOUR DATA IS VALUABLE

Inside and out, data is sensitive, confidential or secret and may be revealed, lost or stolen. Your employees, partners, clients or suppliers must be expected to observe the appropriate confidentiality rules for your operations. This is the principle of GDPR which requires applying a data protection policy.

SECURITY & RISK AUDIT

EXPERTISE

Our audits are never to be seen as "fault finding". With many years of high-level experience, SDS fully masters the specific and at times unusual approach to security and crisis-management in Asia.

NEEDS

out by an external and objective firm, an audit throws light on your strengths and weaknesses and enhances your security.

It identifies:

- Site of risk and vulnerabilities mapping;
- Your specifications list;
- Operational and technological contributions.
- Technical enhancements for your site;
- New competencies for your team;
- Your desired and achievable protection level.
- Setting up bespoke security.
- Responsibility transfer in case of crisis.

RESULT

With a constant creative approach and full field knowledge, the SDS expert assists you in optimizing your solutions with a single objective: targeted, resilient and effective security.

SECURITY & RISK AUDIT

AUDIT

The Audit highlights the security weaknesses and provides solutions from the first rules to the last decision to be taken. Crisis management through a plan is essential in order to protect the company's image and e-reputation after an event. Carried out with security experts, they will assist you during all phases of security upgrading and implementations such as:

- Site and staff security management
- Expertise before staff clearance
- Maintenance assessment
- Field risk audits
- Evaluation of crisis management plans
- Development of communication's tools
- Implementation of specific watching (strategic, influence)
- Implementation of field awareness programs
- Implementation of security upgrades
- Upgrading of existing security safety
- Compliance evaluation of security procedures
- Installation of defense devices, equipment and structure
- Assessment of security plans in situ
- Security and crisis management training / coaching
- ... / ...

TRAINING

Usually, a crisis management plan is developed by the Security Department of your Head Office, but if it's missing, we can elaborate it for you.

All training and coaching can be provided in a focus to a perfect mastering to each level of responsibility from the first Actor to the highest Director.
